

Habitat Progress Check

Name

Date

	Learning Outcomes	✓😊	?😐	✗😞
1	I can define a habitat as the natural home or environment of an animal, plant or other living thing.			
2	I can state examples of different habitats and the organisms that might live there.			
3	I can describe adaptations of living things and relate them to survival in their habitat.			
4	I can suggest consequences to changes in habitat			
5	I can explain why some organisms are more successful than others in a particular habitat			
6	I can use keys to identify living things.			
7	I can describe random sampling as a method of collecting representative data.			
8	I can use quadrats to sample the plants living in 2 different habitats and identify them using keys.			
9	I know how to measure some living and non-living features of a given habitat			
9	I can present results from sampled habitats in a suitable format.			
10	I can compare the biodiversity of each habitat and suggest reasons for your observations.			

In this topic I have successfully.....

To make further progress I should.....

Target: In the next topic I will.....
